Limitless Leadership™

ACCELERATION PROGRAM

Accelerating mindset, collaboration and leadership to take performance and results to the next level!

A 12-month transformation program where like-minded leaders within your business grow together in real time within openly facilitated regular forums in a learn-and-do environment

Shifts the overwhelm of a management mindset to a clearer more focused leadership mindset	Develops leaders who are agile problem solvers	Prepares leaders for a future that may be uncertain	Equips leaders to be able to navigate the subjective challenges of leadership
---	--	---	---

Working with thousands of executives and teams over the last 15 years we find that many encounter the following challenges:

- They are time poor and skill stretched
- Preparing for a future that may or may not exist that needs focus
- Setting a benchmark and challenging the status quo
- A mindset that can become stifled
- They want to work "on" their team and not just "in" their team
- They need to resolve the unresolved people problems and deal with change
- Lack influencing skills to get buy in
- They are transitioning from a management mindset to a leadership mindset
- They want to increase their coaching and mentoring capability
- Succession planning
- A need to become more agile and co-creative
- They need to increase overall level of leadership and results

Leadership is a journey, one that needs to be constantly built on, improved, changed and forever evolving - there is no final destination.

Agility and a Limitless Mindset are now the new leadership black. Leadership today requires you to go wide, deep, and wide again. It requires you to have a clear picture of the future and to be highly responsive to the climate and culture you are in right now. Leadership needs to be adaptive and resistant so you make measurable progress towards a shared dream and vision.

Leadership agility is the ability to apply many and varied leadership styles to fast paced, ever changing environments. It's the ability to read a room, shift a team, understand a person and make meaningful connections that move the mission forward. A bursting mindset is required to embrace change and satisfy intellectual (logic) and emotional (heart) needs.

We find that by shifting mindset and applying new ways of thinking and tools we elevate many executives from below the line, in this model, to above the line, where they become leaders of teams, leaders of leaders and leaders of industry.

Become a LIMITLESS leader of teams, leader of leaders and leader of industry.

LIMITLESS LEADERSHIP™

In the **Limitless Leadership Acceleration Program**, we take you on a journey where we collaborate as an open group of like-minded leaders working on real problems in real time. Through diagnostic tools, workshops, group mentoring and one-on-one coaching, we work through the challenges around mindset, focus and communication and assist skill stretched, time poor leaders to become more agile problem solvers and lead effectively and successfully through the subjective challenges of leadership.

Over 12 months with regular immersions in an openly facilitated forum where the group is mentored and guided through the key leadership enablers. It takes place within a 'learn and do' environment. We help solve real time leadership problems in the room with the people experiencing these problems in real life. We look at the unresolved people problems, the challenges that won't go away and the competencies needed to lead self, teams and organisations. By addressing these challenges head on leaders can solve the unresolved and challenging people problems and take their teams and organisational culture to being **Limitless**.

RENÉE GIARRUSSO

It's rare that you come across standout talent like Renée. I was in awe of Renée's ability to command a room and get people on board with ideas on easy to use coaching and leadership models. Her energy and passion was so inspiring and engaging. Talk about motivating. As a trainer, coach, mentor, leader and facilitator Renée earns my highest recommendation.
